

Coin Roll

Grab some loose change and a couple of dice to play Coin Roll. Teach your young child how to count and learn the value of money.

This simple game for lower elementary students is a fun way to improve your children's math skills while learning how to count money and appreciate the value of money.

Items needed:

- One die
- A small pile of change. For beginners, use only two types of coins – pennies and nickels, or pennies and dimes. For more advanced players, use pennies, nickels, dimes, and quarters.

How to play:

- The child rolls the die and gets the number of pennies shown.
- As the child accumulates more pennies, he or she must convert them to nickels, and as nickels accumulated, he or she must convert them to dimes and quarters.
- Have the child play the game until they reach a predetermined amount.

Variation:

- The game can be made competitive by having two or more players. The first one to reach a predetermined amount is the winner.
